Students in Film and Media Studies look at all aspects of media, including: technical, creative, aesthetic, historical, theoretical and cultural perspectives.

Film and Media Studies students are skilled in audio/visual production, writing, research, and analyzing. As a result, students are prepared for careers as communicators, innovative creators of film and other media texts, and they are competent professionals in such fields as news, public relations, film production and other-media related fields. The degree also prepares students for graduate work in film and media studies.

ANALYZE

- Film archivist
- Film critic
- Program researcher
